Self Diagnostics Option Specifications

<p>GENERAL DESCRIPTION AstraLite Self Diagnostics provides a 8-Bit microprocessor based design. The technologically advanced self test / diagnostic provides increased reliability and decreased maintenance.</p> <p>ASTRALITE DIAGNOSTIC PROVIDES VISUAL INDICATION FOR:</p> <ol style="list-style-type: none"> 1. AC POWER STATUS. 2. ALL DIAGNOSTIC TESTS. 3. ALL UNIT MALFUNCTIONS. <ol style="list-style-type: none"> a. Battery Fault b. Lamps Fault c. Charger Fault d. Transfer Fault 	<p>FEATURES:</p> <ul style="list-style-type: none"> * Meets UL Standard For Self-testing/diagnostic. * Provides automatic self testing and monitoring of unit operation. * Performs routine maintenance and assures operational readiness at all times. * Monitors battery charger. * Monitors emergency lamps. * Routine discharge cycles insures optimum battery performance. * Automatic 1 minute self test every month and 30 minute every 6 months. * Bi-Color flashing LED indicator provides unit status. * All malfunctions retained in memory until corrected and retested. * Manual test allows 1,5,30,90 minute unit check. * Monitors remote lamps
